03 Projects

Personal portfolio website
Designed and developed a fully responsive personal portfolio site to showcase skills, education, certifications, and projects.

- Responsive across desktop and mobile
- Clean, modern interface with smooth scrolling navigation
- Interactive hover animations
- Sections for About, Skills, Education, Projects, Certifications, Contact
- Professional project and certification cards

HTML5 CSS3 JavaScript (basic)

04 Certifications

Hands-On Introduction: Python	LinkedIn Learning
Introduction to Web Design and Development	LinkedIn Learning
Introduction to Prompt Engineering for Generative AI	LinkedIn Learning

05 Areas of interest

Full stack development Software engineering Artificial intelligence Machine learning Web development

Problem solving

06 Career objective

To secure a software engineering internship where I can apply my technical knowledge, enhance my development skills, contribute to real-world projects, and continue growing as a software developer while learning from experienced professionals.
